

## PROPERTIES

The enamel coats that we apply before the last firing greatly optimize the durability as well as the strength of our product.

## APPLICATIONS

Our products adapt visually and physically to indoor and outdoor spaces, such as volcanoes, they do not fear any climatic variation.

## UNIQUE

The crackle effect, almost invisible but so special is an intrinsic quality of glazed lava stone.

## MAINTENANCE

The maintenance of our enameled lava stone is very simple, most classic household products are suitable for it.

## COLORS

We know almost no limits in terms of colorama, your wish for a unique shade is achievable without worries.

## DIMENSIONS

Our maximum size for a one-piece plan is 260cm x 120cm

## RESISTANCE

Before our first stone firing, we apply a product that strengthens the following points: High temperature resistant / anti-scratch / shatterproof / waterproof

## FIRE

Fire resistance level our glazed lava stone is classified 0, moreover not using during our production process any chemical element, it is impossible to have toxic smoke.
